

MY DROP IN THE BUCKET IS...

At UOSA, we understand the value of water. We process on average 34 million gallons per day of wastewater that we treat to drinking water standards. This effort takes resources, but ensures a clean environment and a high quality water supply for nearly 1,000,000 northern Virginians.

We would like to thank our nearly 200 employees who commit every day to protect the public health in the communities that we serve.

This is our drop in the bucket and our contribution to ensure no one in our service area goes a day without water.

TENTH ANNUAL

Imagine a Day Without Water

October 17, 2024
