Open: May 27, 2025 • Close: Open Until Filled

### ABOUT US

Are you passionate about making a difference and being a trusted steward of our most precious resource? UOSA is seeking a highly motivated and enthusiastic individual to join our team!

The **Upper Occoquan Service Authority (UOSA)** is a cutting-edge water recycling facility transforming the way the world thinks about sustainable water solutions. Established in 1978, UOSA serves Fairfax County, Prince William County, and the cities of Manassas and Manassas Park and is the first and longest-operated indirect potable reuse project in the United States. UOSA has been treating and reclaiming water for use as drinking water for nearly 50 years.

From being recognized as a **Utility of the Future** to pioneering advanced research and technology in the industry, our facility now recycles up to 54 million gallons of water per day. UOSA's efforts ensure a reliable supply of high-quality recycled water, contributing to the overall drinking water strategy for the Northern Virginia area.

**If you are ready to be challenged in designing, optimizing, and revolutionizing water treatment systems, then take the next step in your career and apply today to be part of our dedicated team!**

### WHAT YOU'LL BE DOING

As the Capital Program Manager, you will oversee, direct, plan, and execute construction projects associated with the maintenance, operation, expansion, improvement, and rehabilitation of the UOSA collection, delivery, and operation systems. This role will oversee a team of Project Managers tasked to plan and execute construction efforts varying in size from tens of thousands of dollars to hundreds of millions of dollars. Your work will be a critical component of UOSA's Vision to be globally recognized for its leadership in protecting the region's water resources.

### WHO YOU ARE

**Strategic Thinker:** You excel at long-term and short-term planning, ensuring capital projects align with organizational goals and operational efficiency.

**Results-Driven Leader:** You are passionate about delivering impactful infrastructure improvements that enhance water sustainability and community resilience.

**Collaborative Facilitator:** You thrive in cross-functional environments, working closely with engineers, operators, contractors, and stakeholders to drive successful project outcomes.

**Innovative Problem Solver:** You embrace modern engineering principles and technologies, leveraging automation, AI, and advanced project management strategies to optimize construction efforts.

**Detail-Oriented Executor:** You oversee all aspects of capital construction projects; from conception to completion; ensuring adherence to budgets, schedules, and regulatory requirements.
